## Class Discussion \＆Exercise

## Study the Vodacom statement \＆answer the questions：

1．How many days does Oliver have to pay his account， from the date of the statement until the due date？

2．What is another word for＂Balance Brought Forward＂？
3．What does the negative represent in the amount of＂－99＂on the 02／07／2019？

4．Calculate the VAT exclusive amount on the＂Data Promotion－Top Lip MyGig 1＂subscription service．

5．Determine the VAT paid on the＂Data Promotion－ Top Lip MyGig 1＂subscription service．

## Exam Practice

## WATER TARIFFS

Adapted from DBE NSC Nov 2019 - Paper 1 - Q 2.1 - Annexure A EXTRACT FROM MR DANIELS' MONTHLY MUNICIPAL STATEMENT

| Mr KJ Daniels 14 Sirkoon Stre |  | Date: <br> Statement for: |  | 2019/03/12 <br> March 2019 |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| STAND SIZE | NUMBER OF DWELLINGS | DATE OF VALUATION | PORTION | MUNICIPAL VALUATION | REGION |
| $1215 \mathrm{~m}^{2}$ | 1 | 2018/07/01 | R1 | Market value R1 258000 | WARD C |

| ACCOUNT NUMBER: 345678890060 |  |  |  |
| :---: | :---: | :---: | :---: |
|  |  | subtotal <br> (R) | TOTAL <br> AMOUNT (R) |
| Water and sewer |  |  |  |
| Reading period | 2019/01/16 to 2019/02/12 |  |  |
| Meter reading Reading in litres. 1000 litres $=1$ kilolitre | Start: 795000 <br> End: 812000 |  |  |
| Water usage | A kl (kilolitres) |  |  |
| Daily average consumption | B k $\ell$ |  |  |
| Charges for ... kl are based on a sliding scale for a 28 -day period |  |  |  |
| Total water charge (excluding VAT) |  | D |  |
| Water demand management levy |  | 22,64 |  |
| Monthly sewer charge based on stand size (excluding VAT) |  | C |  |
| VAT: 15\% |  | E |  |
|  | PAYMENT DUE |  | xxx |
|  | due date |  | 2019/03/27 |

| STEPPED RESIDENTIAL WATER TARIFF |  | SEWER MONTHLY CHARGE BASED ON STAND SIZE |  |
| :---: | :---: | :---: | :---: |
| KILOLITRES PER CONNECTION PER MONTH | $\begin{gathered} 2018 / 19 \\ \text { TARIFF (R/k) } \\ \text { EXCLUDING } \end{gathered}$ | STAND SIZE ( $\mathrm{m}^{2}$ ) | 2018/19 TOTAL CHARGE (IN RAND) EXCLUDING $15 \%$ VAT |
| from 0 to 6 | 8,28 | Up to and including $300 \mathrm{~m}^{2}$ | 194,67 |
| above 6 to 10 | 8,79 | Larger than $300 \mathrm{~m}^{2}$ to $1000 \mathrm{~m}^{2}$ | 378,95 |
| above 10 to 15 | 15,00 | Larger than $1000 \mathrm{~m}^{2}$ to $2000 \mathrm{~m}^{2}$ | 573,29 |
| above 15 to 20 | 21,83 | Larger than $2000 \mathrm{~m}^{2}$ | 836,02 |

## Use the information from the Municipal Statement provided to answer the questions:

1. Write down the market value in words.
2. Calculate $\mathbf{A}$, the water usage.
3. Calculate $\mathbf{B}$, the daily average consumption, based on a sliding scale for a 28-day period. Round off your answer to 2 decimal places.
4. Determine the value of $\mathbf{C}$, the monthly sewer charge based on stand size (excluding VAT).
5. Use the stepped residential water tariff table to calculate the value of $\mathbf{D}$, the total water charge (excl. VAT).
6. Calculate E, the total VAT on the total water charge and the monthly sewer charge.

## Exam Practice Answers

1. One million, two hundred and fifty-eight thousand
2. Water usage $=812000-795000=17000$ litres

$$
A=17000 \ell \div 1000=17 \mathrm{kl}
$$

3. Daily average water consumption $(\mathbf{B})=17 \mathrm{kl} \div 28$ days $=0,61 \mathrm{kl} /$ day
4. Monthly sewer charge excluding VAT (C) = R573,29

| Kilolitres per <br> connection per month | $2018 / 19$ Tariff $(\mathrm{R} / \mathrm{kl})$ <br> (excl. 15\% VAT) | ( Range of each <br> step | 2 Cumulative / <br> running totals | 3 Cost per step |
| :--- | :--- | :--- | :--- | :--- |
| from 0 to 6 | 8,28 | $6-0=6 \mathrm{kl}$ | 6 kl | $6 \mathrm{kl} \times \mathrm{R} 8,28=\mathrm{R} 49,68$ |
| above 6 to 10 | 8,79 | $10-6=4 \mathrm{kl}$ | $6+4=10 \mathrm{kl}$ | $4 \mathrm{kl} \times \mathrm{R} 8,79=\mathrm{R} 35,16$ |
| above 10 to 15 | 15,00 | $15-10=5 \mathrm{kl}$ | $10+5=15 \mathrm{kl}$ | $5 \mathrm{kl} \times \mathrm{R} 15,00=\mathrm{R} 75,00$ |
| above 15 to 20 | 21,83 | $20-15=5 \mathrm{kl}$ | $15+2=17 \mathrm{kl}$ | $2 \mathrm{kl} \times \mathrm{R} 21,83=\mathrm{R} 43,66$ |

5. Total water charge (D) $=$ R49,68 + R35,16 + R75,00 + R43,66 = R203,50
6. Total water charge (D) + Monthly sewer charge $(C)=R 203,50+R 573,29=R 776,79$

$$
\therefore \text { Total VAT }(E)=\frac{15}{100} \times \mathrm{R} 776,79=\mathrm{R} 116,52
$$

## COST PRICE, SELLING PRICE \& PROFIT

## Class Exercise or Quiz

## Back to

Basics!
Fill in the missing words:

1. $\quad$ Selling price $=$ $\qquad$ + profit
2. Profit $=$ $\qquad$ - cost price
3. Cost price $=$ $\qquad$ - profit

4. 

6. ................ = selling price - profit
7. ................ = expenses + profit
8. ................ = selling price - cost price
9. Selling price $=$ profit +
10. Cost price $=$ Selling price -

## DBE NSC - May/June 2019-Paper 1-Question 2

2.1 Susan intends selling cups of Milo at the local taxi rank for extra money. Milo is a nutritious supplementary drink developed to provide active people with key vitamins and minerals.
ANNEXURE B shows the advertisement from her local store where she intends to buy her stock. Use ANNEXURE B to answer the questions that follow.
2.1.1 Determine the unit price when purchasing Milo option 2.
2.1.3 Explain the meaning of the word cost price
2.1.4 Susan decided to exclude the cost of water when calculating the cost price per cup of Milo. TABLE 1 below shows how Susan calculated the cost price of ONE cup of Milo. TABLE 1: COST PRICE OF ONE CUP OF MILO

| QUANTITY <br> BOUGHT | COST OF <br> INGREDIENTS | AMOUNT USED <br> FOR ONE CUP | COST PER <br> CUP OF MILO |
| :--- | :---: | :---: | :---: |
| 1 kg Milo | $\mathrm{R} 97,95$ | $0,04 \mathrm{~kg}$ | A |
| $1 \ell$ milk | $\mathrm{R} 11,99$ | B | $\mathrm{R} 1,20$ |
| $2,5 \mathrm{~kg}$ sugar | $\mathrm{R} 33,20$ | $0,01 \mathrm{~kg}$ | $\mathrm{R} 0,13$ |
| 25 foam cups | C | ONE | $\mathrm{R} 1,78$ |
| 50 spoons | $\mathrm{R} 12,75$ | ONE | $\mathrm{R} 0,26$ |
| TOTAL COST |  |  |  |

(a) Calculate $\mathbf{A}$, the cost of Milo per cup
(b) Determine B, the amount of milk, in litres, used for ONE cup of Milo.
(c) Write down the value of $\mathbf{C}$, the cost of 25 foam cups
(d) Show that the cost of ONE cup of Milo, $\mathbf{D}$, is R7,29.

| 2.1.5 | $\begin{aligned} & \text { Profit }=\text { R } 7,29 \times \frac{25}{100} \checkmark \\ & \text { Selling price }=\text { R1,8225 }+ \text { R7,29 } \\ & \text { Selling price }=\text { R9,1125 } \\ & =\text { R9,11 OR R9,10 } \end{aligned}$ |

## BREAK-EVEN \& PRICING

## Integrated Exam Question continued .

## DBE NSC - May/June 2019-Paper 1 - Question 2

2.2 Susan started her business one month later and because of the price increase of products, it then cost her R9,50 to make ONE cup of Milo. She calculated that the daily fixed cost was R90,00 and she woud be able to sell 100 cups of Milo per day. She will sell the Milo at R12,50 per cup. Use the information above to answer the questions that follow.
2.1.1 TABLE 2 shows the income from the sale of cups of Milo.

TABLE 2: INCOME FROM THE SALE OF CUPS OF MILO

| Number of cups of <br> Milo (n) | 0 | 20 | 30 | 40 | 80 | 100 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Income in rand (R) | 0 | 250 | 375 | P | 1000 | 1250 |

(a) Determine the value of $\mathbf{P}$ in TABLE 2 above.
(b) Write down an equation that can be used to calculate the income.
(c) Identify the independent variable in TABLE 2.
2.2.2 Susan uses the following formula to determine the cost price of the cups of Milo:

Cost $=$ R90,00 + R9,50 $n$ where $n=$ number of cups of Milo
TABLE 3 shows the cost price for a number of cups of Milo.
TABLE 3: COST PRICE OF A NUMBER OF CUPS OF MILO

| Number of cups of <br> Milo (n) | 0 | 20 | 30 | Q | 80 | 100 |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Cost price in rand (R) | 90 | 280 | 375 | 612,50 | 850 | 1040 | Calculate the value of Q in TABLE 3 above.

2.2.3 The graph on ANSWER SHEET 1 shows the total income for making up to 100 cups of Milo. Use the information in TABLE 3 to draw another graph representing the cost from the selling of up to 100 cups of Milo.
(2)

(2)
(2) Independent variable ...

Highlight key info: .. cost Rg,50 to make 1 cup .. daily fixed cost R90,00 . sell 100 cups per day . sell at R12,50 per cup

Use the tables or graphs on ANSWER SHEET 1 to answer the following questions.
(a) Explain the meaning of the word break-even in the context of the question.
(b) Determine the number of cups of Milo at the break-even point.
(3)
$\qquad$
(2)

| Q | Solution |
| :---: | :---: |
| 2.2.1 (a) | $\begin{aligned} & \mathrm{P}=40 \times \mathrm{R} 12,50 \checkmark \\ & =\mathrm{R} 500,00 \checkmark \end{aligned}$ |
| 2.2.2 (b) | Income in rand $=$ R12,50 $\times$ number of cups of milo/n $\checkmark \checkmark$ |
| 2.2.1 (c) | Number of cups of milo/n $\checkmark \checkmark$ |
| 2.2.2 | $\begin{aligned} & \mathrm{R} 612,50=\mathrm{R} 90,00+(\mathrm{R} 9,50 \times \mathrm{n}) \\ & \mathrm{R} 612,50-\mathrm{R} 90,00=\mathrm{R} 9,50 \times \mathrm{n} \checkmark \\ & \mathrm{n}=\frac{522,50}{9,50} \\ & \mathrm{Q}=55 \\ & \end{aligned}$ |
| 2.2.3 |  <br> 1A start of graph - cost price $(0 ; 90)$ <br> 1 A end of graph - cost price ( $100 ; 1040$ ) <br> 1 A joining the points in a straight line graph |
| 2.2.4 (a) | The cost price for the number of cups of Milo sold and the selling price of that number is the same (equal). No profit or loss $\sqrt{ } \checkmark$ |
| 2.2.4 (b) | 30 cups $\checkmark \checkmark$ |

## Answers

## Practice Question

5.1 The table below shows a summary of a small short-term loan scenario. The interest rate on this loan remains the same during the whole life of the loan.

| End of Month | Interest | Balance Before Payment | Payment | Closing Balance After Payment |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | R 1000,00 |
| July | R 90,00 | R 1 090,00 | R 225,00 | R 865,00 |
| Aug | R 77,85 | R 942,85 | R 225,00 | R 717,85 |
| Sept | R 64,61 | R 782,46 | R 225,00 | R 557,46 |
| Oct | R 50,17 | R 607,63 | R 225,00 | R 382,63 |
| Nov | R 34,44 | R 417,06 | R 225,00 | R 192,06 |
| Dec | R 17,29 | R 209,35 | R 209,35 | R 0,00 |

5.1.1 What was the original loan amount?
5.1.2 Show that interest on this loan is being calculated at $9 \%$ per month.
5.1.3 Show how the Closing Balance After Payment value for October has been calculated.
5.1.4 Explain why the Payment value in December is different from every other month 5.1.5 Calculate the real cost of this loan
5.2 Now consider what would happen if the interest rate changed from $9 \%$ to $10 \%$ in September and remained at $10 \%$ until the end of the loan period.

| End of Month | Interest | Balance Before Payment | Payment | Closing Balance After Payment |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  |  | R 1000 |
| July | R 90,00 | R 1090,00 | R 225,00 | R 865,00 |
| Aug | R 77,85 | R 942,85 | R 225,00 | R 717,85 |
| Sept | R 71,79 | R 789,64 | R 225,00 | R 564,64 |

5.2.1 Show that interest in September is calculated at $10 \%$
5.2.2 Complete the table to include the months of October to January
5.2.3 Calculate the real cost of this loan.
5.2.4 Explain the effect of a $1 \%$ increase in the interest rate on this loan
5.1.1 R1 000,00
5.1.2 Interest rate $=\frac{\mathrm{R90,00}}{\mathrm{R} 1000,00} \times 100 \%$
5.1.3 Closing Balance after Payment
= balance before payment - paymen
= R607,63-R225,00
= R382,63
5.1.4 The outstanding balance in December is R209,35. So, to pay off the loan a payment of R209,35 and not $\mathrm{R} 225,00$ is necessary
5.1.5 Real cost of the loan $=(R 225,00 \times 5)+R 209,35$

R1 125,00 + R209,35
= R1 334,35

| 5.2.2 |
| :--- |
| End of <br> month Interest Balance <br> before <br> payment Payment Closing <br> balance after <br> payment <br>     R 1000 <br> July $\mathrm{R} 90,00$ $\mathrm{R} 1090,00$ $\mathrm{R} 225,00$ $\mathrm{R} 865,00$ <br> Aug $\mathrm{R} 77,85$ $\mathrm{R} 942,85$ $\mathrm{R} 225,00$ $\mathrm{R} 717,85$ <br> Sept $\mathrm{R} 71,79$ $\mathrm{R} 789,64$ $\mathrm{R} 225,00$ $\mathrm{R} 564,64$ <br> Oct $\mathrm{R} 56,46$ $\mathrm{R} 621,10$ $\mathrm{R} 225,00$ $\mathrm{R} 396,10$ <br> Nov $\mathrm{R} 39,61$ $\mathrm{R} 435,71$ $\mathrm{R} 225,00$ $\mathrm{R} 210,71$ <br> Dec $\mathrm{R} 21,07$ $\mathrm{R} 231,78$ $\mathrm{R} 225,00$ $\mathrm{R} 6,78$ <br> Jan $\mathrm{R} 0,68$ $\mathrm{R} 7,46$ $\mathrm{R} 7,46$ $\mathrm{R} 0,00$ |

5.2.3 Real cost of the loan $=(R 225,00 \times 6)+R 7,46$

$$
=R 1350,00+R 7,46
$$

5.2.4 A $1 \%$ increase in the interest rate will increase the total amount paid back for this small loan by R1 357,46-R1 334,35 = R23,11 and will increase the amount of time taken to pay back the loan from
6 months to 7 months

$$
=9 \%
$$

$$
\text { 5.2.1 Interest rate }=\frac{\mathrm{R} 71,79}{\mathrm{R} 717,85} \times 100 \%=10 \%
$$

5.2.2

$$
=\text { R1 357,46 }
$$

## INTEREST

## VAT

## Summary

## V.A.T.

Value Added Tax
@ 15\%
Paid to government

## VAT

$=15 \% \times$ VAT-excl. price
e.g. Calculate VAT on milk if it costs R25,00 excl. VAT.

$$
\begin{aligned}
\text { VAT } & =15 \% \times \mathrm{R} 25,00 \\
& =\text { R3,75 }
\end{aligned}
$$

## VAT-incl.

$=$ VAT-excl. price $\times 115 \%$
$=$ VAT + VAT-excl. price

## VAT-Exempt (\#)

No VAT charged on selected basic goods e.g. fruit, veg, milk, rice

## VAT-excl.

$$
=\text { VAT-incl. price } \div 115 \%
$$

e.g. Calculate VAT-excl. price of milk if it costs R28,75 incl. VAT.

VAT-excl. price
= R28,75 $\div 115 \%$
= R25,00

## Answers

1. Price of one Clover Feta Cheese
$=R 90,00 \div 2$
$=$ R45,00 incl. VAT
2. Price of one Lancewood Cheese $=$ R97,50 incl. VAT

Price excl. VAT $=$ R97,50 $\div 115 \%$

$$
=R 84,78
$$

3. Total of VAT-able goods
$=$ R195 + R90 + R1,04 = R286,04 incl. VAT
Total of VAT-able goods excl. VAT
$=$ R286,04 $\div 115 \%$
= R248,73
$\therefore$ VAT $=$ VAT-incl. total - VAT-excl. total
$=$ R286,04 - R248,73
= R37,31

## (1) Taxable Income

= Gross income - Non-taxable
Deductions (e.g. RA, pension)
ANNUAL! $\times 12$ months

## (4) Income Tax

= Rate of tax - Rebates

| TAX BRACKET |  |
| :--- | ---: |
| Primary | R14 220 |
| Secondary (65 and older) | R7 794 |
| Tertiary (75 years and older) | R2 601 |

MONTHLY! $\div 12$ months

## 5 Net Income

= Gross MONTHLY income total MONTHLY deductions (e.g. income tax, medical aid, UIF)

## Summary

## INCOME TAX

## (2) Tax Bracket

TABLE 7: TAX RATES FOR 2019/20 TAX YEAR (1 Mar. 2019 to 28 Feb. 2020

| TAX <br> BRACKET | TAXABLE <br> INCOME (R) | RATES OF TAX (R) |
| :---: | :--- | :--- |
| 1 | $1-195850$ | $18 \%$ of taxable income |
| 2 | $195851-305850$ | $35253+26 \%$ of taxable income above 195850 |
| 3 | $305851-423300$ | $63853+31 \%$ of taxable income above 305850 |
| 4 | $423301-555600$ | $100263+36 \%$ of taxable income above 423300 |
| 5 | $555601-708310$ | $147891+39 \%$ of taxable income above 555600 |
| 6 | $708311-150000$ | $207448+41 \%$ of taxable income above 708310 |
| 7 | 1500001 and above | $532041+45 \%$ of taxable income above 150000 |
| [Adapted from www.sars.gov.za] |  |  |

## 3 Rate of Tax

Work
backwards!
e.g.Taxable income = R370 000

Tax bracket 3:
63853 + 31\% of taxable income above 305850
Rate of tax
= R63 853 + 31\% of (R370 $000-R 305$ 850)
$=R 63853+31 \% \times R 64150$
= R63 853 + R19 886,50
= R83 739,50 per annum

## Class Exercise

## INCOME TAX

7.1 The table below shows the income tax brackets for the 2016/2017 financial year (Source: South African Revenue Service, 2016 Budget Tax Guide, p.2)

|  | Income Tax Brackets 2008/2009 <br> Income Tax for Individuals |  |  |  |  |
| :---: | :---: | :--- | :---: | :---: | :---: |
| Tax Bracket |  |  |  | Taxable Income (R) | Rates of Tax (R) |
| 1 | $0-188000$ | $18 \%$ of each R1 |  |  |  |
| 2 | $188001-293600$ | $33840+26 \%$ of the amount above 188 000 |  |  |  |
| 3 | $293601-406400$ | $61296+31 \%$ of the amount above 293600 |  |  |  |
| 4 | $406401-550100$ | $96264+36 \%$ of the amount above 406 400 |  |  |  |
| 5 | $550101-701300$ | $147996+39 \%$ of the amount above 550 100 |  |  |  |
| 6 | 701301 and above | $206964+41 \%$ of the amount above 701 300 |  |  |  |

## Tax Rebates

| Tax Rebates |  |
| :---: | :---: |
| Rebates | R |
| Primary | 13500 |
| Secondary (Persons 65 and older) | 7407 |

7.2 Solly is a 28 year-old who earns R15 090 per month.
7.2.1 Use the tax table for 2016/2017 above to calculate Solly's monthly income tax contribution.
7.2.2 If Solly is given a $13^{\text {th }}$ cheque at the end of every year, how will this affect the total amount of tax that he has to pay on his salary?
7.2.3 If Solly is given an $8 \%$ increase on his gross salary, how much of the increase will he actually receive after tax every month? (For this question, ignore the $13^{\text {th }}$ cheque and work with 12 salaries for the year.)

## Answers

| 7.1.2 | $\begin{aligned} \text { R17 } 100,00 \text { per month } & =17100 \times 12 \text { months } \\ & =\text { R205 } 200,00 \text { per year } \\ & =\text { Tax bracket } 2 \end{aligned}$ | 7.2.3 | $\begin{aligned} \text { Old salary } & =R 15090,00 \text { per month } \\ \text { New salary } & =R 15090,00+8 \% \times R 15090,00 \\ & =R 15090,00+R 1207,20 \end{aligned}$ |
| :---: | :---: | :---: | :---: |
| 7.1.3 | Primary rebate of R13 500,00 |  | = R16 297, 20 |
| 7.1.4 | 65 years and older |  | $\begin{aligned} \text { New annual salary } & =\mathrm{R} 160297,20 \times 12 \\ & =\mathrm{R} 195566,40 \text { (tax bracket } 2 \text { ) } \end{aligned}$ |
| 7.2.1 | $\begin{aligned} \text { Annual income } & =\mathrm{R} 15090 \times 12 \\ & =\mathrm{R} 181080 \\ \therefore \text { Annual tax } & =\frac{18}{100} \times \mathrm{R} 181080(\text { tax bracket } 1) \\ & =\mathrm{R} 32594,40 \end{aligned}$ |  | $\begin{aligned} & \text { Yearly tax } \\ & =\text { R33 } 840,00+26 \% \times(R 195566,40-R 188000,00) \\ & =\text { R33 } 800,00+26 \% \times R 5666,40 \\ & =\text { R33 } 840,00+\text { R1 } 967,26 \\ & =R 35807,26 \end{aligned}$ |
|  | $\begin{aligned} \text { Actual tax } & =\mathrm{R} 32594,40-\mathrm{R} 13500 \\ & =R 19094,40 \\ \text { Monthly tax } & =R 19094,40 \div 12 \end{aligned}$ |  | Actual tax payable per year <br> = R35 807,26-R13 500,00 (primary rebate) <br> = R22 307,26 <br> = R1 858 .94 per month |
|  | = R1 591,20 Annual income with $13^{\text {In }}$ cheque |  | So, increase in salary of R1 207,20 (8\%) brings about an increase in tax of R1 858,94-R1 591,20 (monthly tax on original salary) $=\mathrm{R} 267,74$. |
| 7.2.2 | $=\mathrm{R} 181$ 080,00 + R15 090,00 <br> $=$ R196 170,00 (tax bracket 2) |  | So, the amount of the increase in salary that Solly will actually take home is R939,46. |
|  | $\begin{aligned} & \text { Yearly tax } \\ & =\text { R33 } 840,00+25 \% \times \text { R196 } 1770,00-\text { R188 000,00 } \\ & =\text { R33 } 840,00+55 \% \times R 8170,00 \\ & =\text { R33 } 840,00+\text { R2 } 242,50 \\ & =\text { R } 3588282,50 \end{aligned}$ |  |  |
|  | Actual tax payable per year <br> $=$ R35 882,50-R13 500,00 (primary rebate) <br> $=$ R22 382,50 |  |  |
|  | So, receiving a $13^{\text {th }}$ cheque will mean that Solly will pay R22 382,50-R19 094,40 = R3 288,10 more tax during the year |  |  |

7.2.3 Old salary $=$ R15 090,00 per month New salay $=$ R R $2000,00+8 \% \times R 15090,00$ $=R 16$ 297,20

Whan = R160 297,20×12
$=$ R33 $840,00+26 \% \times($ R195 566,40-R188 000,00) $=$ R33 840,00 $+26 \% \times R 7566,40$
$=$ R335 807,26
= R35 807,26-R13 500,00 (primary rebate) $=R 22$ 307,26
$=$ R1 858,94
So, increase in salary of R1 $207,20(8 \%)$ brings (monthly tax on original salary) $=$ R267,74. So, the amount of the increase in salary that Solly will actually take home is $\mathrm{R} 939,46$.

## EXCHANGE RATES

## Exam Practice

## DBE NSC - Feb/Mar 2017 - Paper 2 - Question 3

Jumanda's three friends from Angola will visit him in Upington. They plan to stay at a resort that charges R850 per unit per day for accomodation.
The following exchange rates may be used:

- Kz100 $000=$ R9 173,05 and
- $\$ 1=$ Kz 169,27344
[Source: Coinmill.com, 2 June 2016]
Use the information above to answer the questions that follow.
3.3.1 Determine (in Kz) the equal amount that EACH of the friends must contribute towards the accomodation per day.
3.3.2 The average monthly disposable salary (ADMS) in Angola is $\$ 1760,41$ and in South Africa it is R16 500.

The average montly rental cost for an apartment in Angola is Kz145 990, whereas a similar apartment in South Africa costs R4 430 per month.
One of the friends stated, 'The average rental cost of an apartment in Angola, expressed as a perentage of the AMDS, is double the percentage of a similar apartment in South Africa.
Verify, showing ALL calculations, whether this statement is valid.

## Answers

| 3.3.1 | $\begin{aligned} & \text { Accomodation per person }=\frac{\mathrm{R} 850}{3} \checkmark \\ &=\mathrm{R} 283,33 \\ & \text { Kz100 } 000=\mathrm{R} 9173,05 \end{aligned}$ $\begin{aligned} \text { Amount Kwanza } & =\frac{\mathrm{R} 283,33}{\mathrm{R9} 1133,05} \times \mathrm{Kz100} 000 \\ & \approx \mathrm{Kz} 3088,76 \checkmark \end{aligned}$ <br> OR $\begin{aligned} \mathrm{R} 9173,05 & =\mathrm{Kz} 100000 \\ \mathrm{R} 1 & =\frac{100000}{9173,05} \quad \\ & =\mathrm{Kz} 10,9014995 \\ \therefore \mathrm{R} 850 \quad & =\mathrm{Kz} 10,9014995 \times 850 \\ & \approx \mathrm{Kz} 9266,27 \quad \end{aligned}$ <br> Cost per person $=\frac{9266,27}{3} \checkmark$ $\approx K z 3 \text { 088,76 }$ |
